

ST. JOSEPH COLLEGE OF ENGINEERING AND TECHNOLOGY
NTA LEVEL 5 - TECHNICIAN CERTIFICATE
CONTINUOUS ASSESSMENT TEST - II - FEBRUARY-2026
EDT 05103 - APPLIED CHEMISTRY

SEMESTER: I

YEAR: II

DURATION: 1 Hr 30 Min.

MAX. MARKS: 50

PART - A (Answer all the Questions)

1. The compressive strength of cement increases from 10^2 N/m^2 when initially set to 10^4 N/m^2 after ____ days, reaching 70% of its final strength value after ____ days.
2. What is a reclaimed rubber?
3. Define leaching as a concentration method in metallurgical operation.
4. What is powder metallurgy?
5. List the methods of making metal powder in powder metallurgy.
6. Why is concentration an important step that cannot be skipped during metallurgical operations?
7. Mention the metal constituents of Amalgam Alloy.

PART - B (Answer any three Questions)

8. How is lime used in mining and metallurgy?
9. Explain the meaning of the following: Quicklime, Hydrated lime, and Dolomite lime.
10. a) Define adhesive.
b) What is bonding in adhesives?
